

一、脚本化条件

common > scripted_triggers > Generic_scripted_triggers.txt

```
##不在任何经济阵营
not_in_any_economy_faction = {
    check_variable = { THIS.economy_faction_var = 0 }
    ## 1 世界贸易组织
    ## 2 经济互助委员会
    ## 3 柏林经济协定
    ## 4 维也纳公约
    ## 5 玫瑰国际
    ## 6 关税同盟
}
```

如果增添新的经济阵营，请及时添加
邀请新成员的条件中建议加上不在任何经济阵营的条件

二、脚本化效果

(以玫瑰国际为例)

```
### 玫瑰国际计算 ###
Rose_International_effect = {
    ### 统计经济阵营成员数量
    clear_array = global.Rose_International_member ##成员所在的数组
    set_variable = { global.num_of_Rose_International = 0 } ##成员数量变量
    every_country = {
        limit = { check_variable = { THIS.economy_faction_var = 5 } }
        add_to_array = { global.Rose_International_member = THIS }
        add_to_variable = { global.num_of_Rose_International = 1 }
    }
    ### 计算动态阵营buff (如果有)
    GFU_Rose_International_modifier_effect = yes
    ### 刷新经济阵营GDP
    compute_global_gdp = yes
}
```

红框不可替代，蓝框根据需求替换，比如 5 对应玫瑰国际，Rose_International_member 对应玫瑰国际的成员数组，num_of_Rose_International 代表成员数量

三、Ideas

(建议写为隐藏 idea) (以玫瑰国际为例)

红框内容视情况改变，例中 5 对应玫瑰国际，Rose_International_effect 也对应玫瑰国际
新成员国只需要添加上该 idea 就行

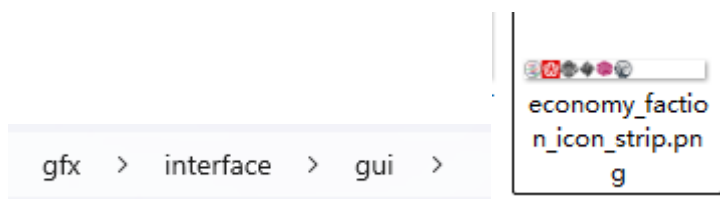

```

#玫瑰国际
GEU_Rose_International_idea = {
    name = GEU_Rose_International_Title
    allowed = {
        always = yes
    }
    removal_cost = -1
    allowed_civil_war = {
        always = yes
    }
    available = {
        any_country = {
            or = {
                has_government = communism
                has_country_leader_ideology = socialism
            }
            is_faction_leader = yes
            has_completed_focus = GEU_Rudolph_Economic_Plan
            not = { has_war_with = ROOT }
        }
        or = {
            has_government = communism
            has_country_leader_ideology = socialism
        }
        check_variable = { ROOT.economy_faction_var = 5 }
        is_in_the_same_economy_faction_with_overlord = yes ##与宗主国处于相同经济阵营
    }
    modifier = {
        consumer_goods_factor = -0.15
        production_speed_buildings_factor = 0.1
        hcp_income_factor_monthly = 0.1
    }
    on_add = {
        set_variable = { economy_faction_var = 5 } ##设置阵营变量
        Rose_International_effect = yes ##计算阵营相关
    }
    on_remove = {
        set_variable = { economy_faction_var = 0 } ##设置阵营变量
        Rose_International_effect = yes ##计算阵营相关
    }
}

```

四、图标

中 60x60 用于 GUI 展示

添加在后面（必须要与经济阵营对应的变量数字对应），如果不够则加长，并修改注册

```

spriteType = {
    name = "GFX_economy_faction_icon_strip"
    texturefile = "gfx/interface/gui/economy_faction_icon_strip.png"
    noOfFrames = 10
    transparencycheck = yes
}

```

小 24x24 用于排行榜等文字中 自行注册

五、本地化

（以玫瑰国际为例）

```
#玫瑰国际
Rose_International_dipo_Title: "$P玫瑰国际$"
GEU_Rose_International_Title: "€Rose_International_text_icon $P玫瑰国际$"
GEU_Rose_International_leader: "€Rose_International_text_icon $P玫瑰国际$!领袖"
Rose_International_TT: "[GET_Rose_International_modifier]"
Rose_International_dipl TT: "$Y{From.GetNameOver}$的经办同盟属于€Rose_International_text_icon $P玫瑰国际$\n\n[GET_Rose_International_modifier]"
Rose_International_desc: "€Rose_International_text_icon $P玫瑰国际$!是由德国经济学家鲁道夫·希法亭提出的世界左翼国家经济互助组织，由德国作为领袖，率领世界左翼国家的经济建设。"
```

红框是因为 P 社的笨蛋代码，需要嵌套一下

```
defined_text = {
    name = GET_Rose_International_modifier
    text = {
        localization_key = Rose_International_modifier
    }
}
```

```
Rose_International_modifier: "€Rose_International_text_icon $P玫瑰国际$!产生的修正为：
\n-$MODIFIER_CONSUMER_GOODS_EXPECTED_VALUE$: $Y-15.0%$!\n-$MODIFIER_PRODUCTION_SPEED_BUILDINGS_FACTOR$: $G+10.0%$!\n-HCP收入增加$G10%$! Ehcp_small /月"
```

需要文字写出修正

common > scripted_localisation > adorable_heart_UBS.txt

```
defined_text = {
    name = Get_economy_faction_name ##标题-文字
    text = {
        trigger = {
            check_variable = { economy_faction_var = 1 }
        }
        localization_key = WTO_dipo_title
    }
    text = {
        trigger = {
            check_variable = { economy_faction_var = 2 }
        }
        localization_key = SOV_CMEA_Title
    }
    text = {
        trigger = {
            check_variable = { economy_faction_var = 3 }
        }
        localization_key = DVL_Berlin_Economic_Agreement_Title
    }
    text = {
        trigger = {
            check_variable = { economy_faction_var = 4 }
        }
        localization_key = Vienna_Convention_Title
    }
    text = {
        trigger = {
            check_variable = { economy_faction_var = 5 }
        }
        localization_key = GEU_Rose_International_Title
    }
    text = {
        trigger = {
            check_variable = { economy_faction_var = 6 }
        }
        localization_key = GER_Customs_Union_Title
    }
}
```

```
defined_text = {
    name = Get_economy_faction_TT ##buff介绍-政治界面
    text = {
        trigger = { check_variable = { economy_faction_var = 1 } }
        localization_key = WTO_TT
    }
    text = {
        trigger = { check_variable = { economy_faction_var = 2 } }
        localization_key = SOV_CMEA_dipo_button_tt
    }
    text = {
        trigger = { check_variable = { economy_faction_var = 3 } }
        localization_key = Berlin_Economic_Agreement_TT
    }
    text = {
        trigger = { check_variable = { economy_faction_var = 4 } }
        localization_key = Vienna_Convention_TT
    }
    text = {
        trigger = { check_variable = { economy_faction_var = 5 } }
        localization_key = Rose_International_TT
    }
    text = {
        trigger = { check_variable = { economy_faction_var = 6 } }
        localization_key = Customs_Union_TT
    }
    text = {
        localization_key = empty_modifier
    }
}
```

```

defined_text = {
    name = Get_economy_faction_dipl_TT    ##buff介绍-外交界面
    text = {
        trigger = { check_variable = { economy_faction_var = 1 } }
        localization_key = WTO_dipl_TT
    }
    text = {
        trigger = { check_variable = { economy_faction_var = 2 } }
        localization_key = SOV_CMEA_dipo_button_tt
    }
    text = {

        localization_key = Vienna_Convention_dipl_TT
    }
    text = {
        trigger = { check_variable = { economy_faction_var = 5 } }
        localization_key = Rose_International_dipl_TT
    }
    text = {
        trigger = { check_variable = { economy_faction_var = 6 } }
        localization_key = Customs_Union_dipl_TT
    }
    text = {
        localization_key = empty_modifier
    }
}

```

```

defined_text = {
    name = Get_economy_faction_desc    ##阵营介绍
    text = {
        trigger = { check_variable = { economy_faction_var = 1 } }
        localization_key = WTO_desc
    }
    text = {
        trigger = { check_variable = { economy_faction_var = 2 } }
        localization_key = SOV_CMEA_dipo_button_desc
    }
    text = {
        trigger = { check_variable = { economy_faction_var = 3 } }
        localization_key = Berlin_Economic_Agreement_desc
    }
    text = {
        trigger = { check_variable = { economy_faction_var = 4 } }
        localization_key = Vienna_Convention_desc
    }
    text = {
        trigger = { check_variable = { economy_faction_var = 5 } }
        localization_key = Rose_International_desc
    }
    text = {
        trigger = { check_variable = { economy_faction_var = 6 } }
        localization_key = Customs_Union_desc
    }
    text = {
        localization_key = empty_modifier
    }
}

```

```

defined_text = {
    name = Get_economy_faction_dipo_title    ##标题-成员UI
    text = {
        trigger = { check_variable = { temp_economy_faction_var = 1 } }
        localization_key = WTO_title
    }
    text = {
        trigger = { check_variable = { temp_economy_faction_var = 2 } }
        localization_key = SOV_CMEA_dipo_title
    }
    text = {
        trigger = { check_variable = { temp_economy_faction_var = 3 } }
        localization_key = Berlin_Economic_Agreement_dipo_title
    }
    text = {
        trigger = { check_variable = { temp_economy_faction_var = 4 } }
        localization_key = Vienna_Convention_dipo_title
    }
    text = {
        trigger = { check_variable = { temp_economy_faction_var = 5 } }
        localization_key = Rose_International_dipo_title
    }
    text = {
        trigger = { check_variable = { temp_economy_faction_var = 6 } }
        localization_key = Customs_Union_dipo_title
    }
    text = {
        localization_key = empty_modifier
    }
}

```

按照对应的填就行
